SUMMARY

Python Developer and Machine Learning / AI professional with hands-on industry experience in AI agent evaluation, software testing, QA, prompt engineering, and building real-world ML systems. Proficient in Python, SQL, NumPy, Pandas, Scikit-learn, and FastAPI, with experience in test case execution, defect identification, and quality evaluation.

EDUCATION

Medi-Caps University

Bachelor of Technology in Computer Science Engineering

– GPA: 7.10/10

– Relevant Coursework: Object-Oriented Programming, Database Management Systems, Expert System, Linear Algebra, Probability & Statistics

Indore, India

Expected JUNE 2027

EXPERIENCE

Software Engineer Intern

Wedecode.io

May 2026 – July 2026

Indore, India

- Evaluated and benchmarked AI agents across business workflows using structured test cases and performance metrics.
- Performed prompt engineering and LLM evaluation to improve reasoning, response quality, and task completion.
- Assessed RL, Computer Use (CU), and Tool Use (TU) models by analyzing outputs and identifying failure patterns.
- Conducted AI model benchmarking using accuracy, latency, reliability, and hallucination metrics.
- Developed and tested FAST APIs for AI agent integration with backend services and external tools.

PROJECTS

ML-Based Phishing Website Detection & Classification System | *Python, Scikit-learn*

Jan 2026

- Developed a machine learning-based phishing detection system using Python and Scikit-learn to classify URLs as phishing or legitimate based on structural and lexical URL characteristics.
- Implemented a Random Forest classifier with engineered URL features including URL length, special characters, HTTPS usage, subdomains, IP address presence, and suspicious keywords, achieving 93.82% accuracy, 91.12% precision, and 85.31% F1-score.
- Built an interactive Streamlit web application for real-time URL scanning, authentication, classification results, performance metrics, and scan history, with functional, integration, system, performance, and edge-case testing.

AI-Powered Recruitment & Candidate Ranking Platform | *Python, FastAPI, PostgreSQL, Scikit-learn*

Aug 2026

- Developed an AI-powered recruitment platform that parses resumes and job descriptions, extracting skills, experience, education, and candidate information with up to 92% extraction accuracy.
- Built an explainable ML-based candidate ranking engine using skill, semantic, experience, education, project, and certification matching with skill-gap analysis.
- Implemented 100+ resume bulk processing along with end-to-end workflows for job posting, applications, shortlisting/rejection, interview scheduling, and automated offer-letter generation.
- Built FastAPI REST APIs with PostgreSQL and SQLAlchemy and automated testing for authentication, resume processing, applications, ranking, candidate comparison, and recruitment workflows.

TECHNICAL SKILLS

Languages: Python, SQL

ML / AI Libraries: NumPy, Pandas, Scikit-learn, Matplotlib

Domains: Machine Learning, Deep Learning, Data Science, Generative AI, Software Testing

Tools & Concepts: FastAPI, Prompt Engineering, Git, GitHub, Agile Project Management, Feature Engineering, Model Evaluation, Manual Testing, Functional Testing, API Testing, Test Case Design, Bug Reporting

Soft Skills: Team Leadership, Strong Communication, Goal-Oriented, Coordination & Follow-up

CERTIFICATIONS & ACHIEVEMENTS

Systango Hackathon Runner-Up – Systango (January 2025)

Artificial Intelligence, Deep Learning & Python Programming – Infosys Springboard (2025)

Machine Learning & GitHub – Infosys Springboard (2025)

Artificial Intelligence & Agile Project Management – HP LITe (2025)

Quantitative Research Job Simulation – J.P. Morgan (2025)

Career Essentials in Data Analysis – Microsoft (2024)
