SUMMARY

Python Developer and Machine Learning / AI professional with hands-on industry experience in AI agent evaluation, prompt engineering, and building real-world ML systems. Proficient in Python, NumPy, Pandas, Scikit-learn, PyTorch, FastAPI, LangChain, and OpenCV. Experienced in Retrieval-Augmented Generation (RAG), Multi-Agent Systems, and Generative AI applications.

EDUCATION

Medi-Caps University
Bachelor of Technology in Computer Science Engineering
– GPA: 7.2/10
– Relevant Coursework: Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Linear Algebra, Probability & Statistics

Indore, India
Expected May 2027

EXPERIENCE

Software Engineer Intern
Wedecode.io
– Evaluated and benchmarked AI agents across business workflows using structured test cases and performance metrics.
– Performed prompt engineering and LLM evaluation to improve reasoning, response quality, and task completion.
– Assessed RL, Computer Use (CU), and Tool Use (TU) models by analyzing outputs and identifying failure patterns.
– Conducted AI model benchmarking using accuracy, latency, reliability, and hallucination metrics.
– Developed and tested REST APIs for AI agent integration with backend services and external tools.

May 2026 – Present
Indore, India

PROJECTS

ML-Based Phishing Website Detection & Classification System | *Python, Scikit-learn*
– Developed a machine learning classification system using Python and Scikit-learn to detect phishing websites based on URL structure and webpage feature analysis.
– Performed end-to-end preprocessing, feature extraction, model training, and evaluation.
– Optimized model performance using Accuracy, Precision, Recall, and F1-Score metrics.

2025 – 2026

Multi-Agent RAG Assistant for Research & Document Analysis | *Python, LangChain, FAISS*
– Developed a Multi-Agent AI Assistant using Retrieval-Augmented Generation (RAG) for document analysis and research automation.
– Implemented Planner, Research, Analysis, and Report Agents to collaboratively solve complex user queries.
– Built a document ingestion pipeline with semantic search using vector embeddings and FAISS/ChromaDB.
– Developed REST APIs with FastAPI and automated report generation from retrieved document insights.
– Applied LangChain, prompt engineering, vector databases, and LLM orchestration techniques to improve document understanding and information retrieval.

May 2026

TECHNICAL SKILLS

Languages: Python(Advanced), C(Intermediate), C++(Basic), Java(Basic)
ML / AI Libraries: NumPy, Pandas, Scikit-learn, PyTorch, Matplotlib
Computer Vision: OpenCV (Real-Time Video Stream Processing, Face Detection & Recognition)
Domains: Machine Learning, Deep Learning, Computer Vision, Data Science, Generative AI, Retrieval-Augmented Generation (RAG)
Tools & Concepts: FastAPI, Prompt Engineering, Git, GitHub, Agile Project Management, Feature Engineering, Model Evaluation
Soft Skills: Team Leadership, Strong Communication, Goal-Oriented, Coordination & Follow-up

CERTIFICATIONS & ACHIEVEMENTS

Systango Hackathon Runner-Up – Systango (January 2025)
Artificial Intelligence, Deep Learning & Python Programming – Infosys Springboard (2025)
Machine Learning & GitHub – Infosys Springboard (2025)
Artificial Intelligence & Agile Project Management – HP LITe (2025)
Quantitative Research Job Simulation – J.P. Morgan (2025)
Career Essentials in Data Analysis – Microsoft (2024)
